

## Search enhanced with AI

Nalytics is an AI search, discovery and analysis platform. Nalytics extracts data from a wide range of sources to provide highly responsive, secure and accurate contextual access to the knowledge within.

Delivered as a Software as a Service (SaaS), Nalytics can uncover key information from documents, as well as quickly and precisely searching the content of such documents.

Innovation Award finalists in the 2018 Legal & Cyber Security Awards, Nalytics helps individuals, teams and entire organisations access and analyse their data quickly and easily to enhance insight, drive innovation and deliver productivity improvements.

### Nalytics AI Features & Capabilities

- **CONTENT CLASSIFIERS & ENHANCERS**

Automatically classify items of content (text) into logical groups (e.g. contracts vs. lease agreements). Enhance data to surface key values such as dates, addresses, card numbers and people, or highlight key industry language and terminology such as legal privilege.

- **DATA VISUALISATIONS & WORD CLOUDS**

Advanced data visualisations enable deep insight into the textual relationships between entities in your data. Automatically generate word clouds based on frequency of terms or create your own based on business language/terminology.

- **NATURAL LANGUAGE PROCESSING**

Uncover and extract key information from documents using advanced capabilities such as word stemming, near-word matching and synonym/hypernym expansion.

#### Benefits include:

- Improved productivity
- Increased security
- Make better, more informed decisions
- Automate the routine
- Reduced risk
- Save time & resources
- Smarter working
- Facilitate collaboration
